Patrick Cox

(229) 328-0019 | 10jonathancox@gmail.com | LinkedIn | GitHub

Software Engineering student graduating early with hands-on experience in full-stack engineering via C#, .NET, Blazor, automated testing, and database design. Strong focus on building reliable applications with clean architecture, E2E testing, and scalable backend logic.

EDUCATION

Kennesaw State University — Kennesaw, GA
Master of Science in Computer Science — Expected: December 2027
Bachelor of Science in Software Engineering — December 2025
GPA: 3.5

TECHNICAL SKILLS

Programming & Libraries: C#, Java, Python, C++, SQL, JavaScript, HTML, CSS, Assembly (Irvine 32)
Frameworks: .NET, React, Blazor, Avalonia
Testing: NUnit, XUnit, Playwright
Tools: IntelliJ, Rider, PyCharm, WebStorm, Visual Studio, Visual Studio Code, Unity, GIT, Agile

PROFESSIONAL EXPERIENCE

Georgia Watch (GaW) — Marietta, GA
Web Developer – *Independent Contractor* — December 2025 – January 2026

- Developed a hospital accountability scorecard module to append to client's website.
- Composed **JSON** file to parse information on all requested hospitals in Georgia.
- Built initial wireframe via Figma; expanded to basic **HTML-CSS** models for desktop and mobile.
- Codeveloped React modules to optimize user-interface development.
- Implemented **Mapbox.js** to offer an affordable visual guide to consumers for locating nearby hospitals.

Kennesaw State University (KSU) — Marietta, GA
Graduate Teaching Assistant — January 2026 – Present

- Lectured three classes weekly to teach OOP concepts to an average of **120 students**.
- Proctored and graded 120 submissions for Midterm and Final exams.
- Held weekly office hours to provide guidance and counsel to students seeking extra assistance.

Kennesaw State University (KSU) — Marietta, GA
CCSE Tutor / Lab Assistant — January 2024 – December 2025

- Demonstrate OOP concepts for C#, Java, and Python quickly and efficiently on intermediate levels.
- Graded and provided structured feedback on **300+ assignments per semester**, instilling best practices.
- Conducted code reviews that improved student code quality and debugging efficiency.

PROJECTS

Statistic Calculator [Software Testing & QA] | *.Net 8.0, C#, HTML, JavaScript, CSS, NUnit, Playwright*

- Developed using **.NET 8.0** Model-View-Controller (**MVC**) architecture.
- Integrated a full stack web application on JetBrains Rider using **C#** for backend logic and **HTML, CSS,** and **JavaScript** for frontend development.
- Performed automated E2E testing using **Playwright**.
- Executed Unit testing by implementing **NUnit** testing framework.

Ledgr [Software Application Domain] | **Full Stack Development:** *HTML, CSS, JavaScript, C#, SQL, Gmail API, OAuth 2.0, MimeKit*

- Developed a business-scale financial management application with automated statement generation.
- Built a full stack web application using **Blazor** for frontend design and **C#** for backend logic.
- Managed database model and operations using **SQL** queries daily.
- Established a working Email system through **Google API**.
- Authenticated outgoing emails using **OAuth 2.0** library, and formatted emails using **MimeKit**.

Scordle [Discord Bot] | *Python, Discord API, Railway*

- Created a uniform set of commands for tallying points and ranking players via **Python.**
- Deployed using **Railway** to ensure data consistency.
- Gathered an active player base in a private server for testing.
- Generated constraints to mitigate cheating attempts.
